

## Welcome to AutismFIT Newsletter Vol. 2

The Erasmus+ co-funded AutismFIT project focuses on demonstrably improving the living conditions of people with autism using digital tools.

The project officially runs until 2026. An international team from six partner countries is working to achieve the project's objectives.

## Next Step's

The AutismFit project is entering its next stage of development.

On July 7, 2025, all partners met in an online meeting to discuss all preparatory measures for the training in Cyprus, scheduled for September 29 - October 3, 2025.

In Nicosia, all partners will meet again after a long break at the headquarters of the Cypriot partner Emphasys and immerse themselves in an exciting week of training.

The goal of this week is for all participants to present the materials they have developed so far. The host, Emphasys, will provide all necessary arrangements, such as IT support, to ensure the success of this training period.

Of course, this time also offers ample opportunity for cultural and community activities. All partners are already looking forward to it. So, it remains exciting. Keep following us and check our website.
